

Quick Start: What is the Rich Content Editor?

Canvas has a content editor that is available anytime for creating new content. The following Canvas features use the Rich Content Editor:

- Announcements
- Assignments
- Discussions
- Pages
- Quizzes
- Syllabus

The Rich Content Editor includes the content area and the content selector.

1. Anything that can be viewed in a web browser can be inserted into the Rich Content Editor content area.

2. HTML content can also be put directly into Canvas using the HTML Editor link.

3. Users can also easily link to existing files, images, or links, and upload new files and images using the Content Selector. **NOTE:** *Creating links in this way will prevent broken links when you copy the course for future use.*
